

# AGERA® LABORATORIES Pro C Peel System (Powder & Activator)

*This kit contains a 20% L-Ascorbic Acid/antimicrobial ethanolic/water system that is designed to be used alone or in a layered system. AGERA® Laboratories Pro C Peel may be applied prior to an AGERA® Laboratories Pro SLC Peel. Use of this peel prior to stronger SLC peels (SLC-40/SLC-50) may provide beneficial counter-irritant effects. Pro C Peel produces an anti-inflammatory effect with L-Ascorbic Acid. It also helps sterilize the skin and, when applied prior to SLC peels, contributes to the overall strength of the layered AHA/BHA peel.*

## PRODUCT BENEFITS

- Delivers high levels of L-Ascorbic Acid
- Provides the benefits of a peel with low irritation
- May be used in a layered peel system
- May be used prior to microdermabrasion
- Helps enhance the dermal matrix

## INSTRUCTIONS FOR USE

- **SKIN TYPE:** For all skin types
- **DIRECTIONS:** Apply with overlapping strokes. May be washed off after 10 minutes or neutralized in place with AGERA® Laboratories MagC® Peptide Serum. Use as first layer in multilayer peels. Use a fan to dry AGERA Laboratories Pro C Peel prior to application of SLC solution
- **WHEN TO USE:** Use in applications suitable for mild chemical peels

## INGREDIENTS

### POWDER INGREDIENTS (PH 2.5-3.0):

Ascorbic Acid, Calcium Ascorbate, Magnesium Ascorbate, Sodium Ascorbate, Citric Acid, Sodium Citrate

### ACTIVATOR INGREDIENTS (PH 2.5-3.0):

Aqua (Water), Lactic Acid, Hydroxyethylcellulose, Linoleamidopropyl Pg-Dimonium Chloride Phosphate, Polyquaternium-10, 1,2 Hexanediol, Caprylyl Glycol, Tropolone

## PRODUCT APPEARANCE

Clear, light-amber gel

## AROMA

Alcohol

## PRODUCT CATEGORY

Cleanser, anti-inflammatory, pigment suppressor

# AGERA® LABORATORIES Pro Microderma Prep

*This product is designed to help reduce the mechanical sensory effects of microdermabrasion and acts as a mild anti-inflammatory. Its unique Lipopeptide desensitizing system is designed to improve the tolerance of skin to microdermabrasion treatment. The nonsteroidal anti-inflammatory properties of Bisabolol, Centaurium Erythraea Extract, and Matricaria Extract aid in the reduction of erythema during the microdermabrasion treatment. The prepping solution should be applied after cleansing the skin and prior to the beginning of microdermabrasion therapy.*

## PRODUCT BENEFITS

- Effectively prepares the skin for microdermabrasion treatment
- Reduces the mechanical sensory effects to improve the tolerance of the skin
- Delivers anti-inflammatory benefits to reduce erythema

## KEY INGREDIENTS

Prolifersyn® (Myristoyl Hexapeptide-4)

## INSTRUCTIONS FOR USE

- **SKIN TYPE:** For all skin types prior to microdermabrasion
- **DIRECTIONS:** Should be used prior to microdermabrasion
- **WHEN TO USE:** Apply at least 5 minutes prior to microdermabrasion

## INGREDIENTS

Aqua (Water), SD Alcohol 40-B, Acetyl Dipeptide-1 Hexadecyl Ester, Glycerin, Sorbitol, Methyl Gluceth 20, Polyquaternium-10, Beta-glucan, Hydroxyethylcellulose, Aloe Barbadensis Leaf Juice, Caprylic/Capric Triglyceride, Chamomilla Recutita (Matricaria) Flower Extract, Myristoyl Hexapeptide-4 (Prolifersyn®), Lecithin, PEG-6, Carthamus Tinctorius (Safflower) Seed Oil, Oleth 10, Oleth 20, Bisabolol, Propylene Glycol, Diazolidinyl Urea, Methylparaben, Propylparaben.

## PRODUCT APPEARANCE

Clear, low-viscosity gel

## AROMA

# AGERA® LABORATORIES Pro Peel Prep

*This preparative treatment is designed to be applied prior to AHA/BHA/PHA peels. It is an alcohol-based pretreatment that works to cleanse and de-fat the skin surface. AGERA® Laboratories Pro Peel Prep also has anti-inflammatory/counter-irritant and low-irritation properties to help suppress pigmentation.*

## PRODUCT BENEFITS

- De-fats and cleanses the skin, preparing it for AHA/BHA/PHA peels
- Includes non-Hydroquinone pigment suppressors: Bearberry, Mulberry and Licorice extracts
- Delivers plant-derived prostaglandin E1 inhibitors: Centaurium Erythraea and Sigesbeckia Orientalis extracts

## KEY INGREDIENTS

Mulberry Extract  
Licorice Extract  
Bearberry Extract  
Scutellaria Extract  
Kojic Acid  
Centaurium Erythraea Extract  
Sigesbeckia Orientalis Extract

## INSTRUCTIONS FOR USE

- **SKIN TYPE:** For all skin types
- **DIRECTIONS:** Apply to the treatment area. Repeat application until no visible makeup or discoloration on the cotton gauze pad is observed. Allow solution to dry prior to peel application
- **WHEN TO USE:** Use prior to application of chemical peel solutions

## INGREDIENTS

SD Alcohol 40-B, Butylene Glycol, Kojic Acid, Lactic Acid, Glycerin, Aqua (Water), Ethoxydiglycol, PEG-7 Glyceryl Cocoate, Sigesbeckia Orientalis Extract, Centaurium Erythraea Extract, Ascorbyl Palmitate, Morus Nigra Leaf Extract, Glycyrrhiza Glabra (Licorice) Root Extract, Arctostaphylos Uva Ursi Leaf Extract, Scutellaria Baicalensis Root Extract

## PRODUCT APPEARANCE

Clear, light-amber gel

## AROMA

Alcohol

## AGERA® LABORATORIES Pro SLC Peel—24

*This peel provides the benefits of a medium-strength AHA/BHA/PHA peel with minimal irritation. This low-pH (1.8-2.2) system does not require removal and is recommended to be used in a layered system approach with AGERA® Laboratories Pro Peel Prep and the AGERA® Laboratories Pro C Peel System. AGERA® Laboratories Pro SLC Peel—24 is ideal for use on skin that is troubled by mild acne, hyperpigmentation, and fine lines and wrinkles, as well as prior to microdermabrasion. It also provides anti-inflammatory/counter-irritant benefits pre-treatment.*

### PRODUCT BENEFITS

- Delivers the benefits of AHA/BHA/PHA (24% acid concentration)
- Produces a low level of irritation for an AHA peel
- Contains high Salicylic Acid levels and is keratinolytic
- May be layered with AGERA® Laboratories Pro Peel Prep and the AGERA® Laboratories Pro C Peel System
- Helps provide anti-acne benefits

### INSTRUCTIONS FOR USE

- **SKIN TYPE:** For all skin types
- **DIRECTIONS:** Apply with overlapping strokes. May be washed off after 10 minutes or neutralized in place with AGERA® Laboratories MagC® Peptide Serum
- **WHEN TO USE:** Use in applications suitable for mild chemical peels

### INGREDIENTS

# AGERA® LABORATORIES Pro SLC Peel—40

*This peel provides the benefits of a medium-strength AHA/BHA/PHA peel with minimal irritation. This low-pH (1.1-1.2) system does not require removal and is recommended to be used in a layered system approach with AGERA® Laboratories Pro Peel Prep and the AGERA® Laboratories Pro C Peel System. AGERA® Laboratories Pro SLC Peel—40 is ideal for use on skin that is troubled by mild acne, hyperpigmentation, and fine lines and wrinkles, and can be used prior to microdermabrasion. And, it also provides anti-inflammatory/counter-irritant benefits pre-treatment.*

## PRODUCT BENEFITS

- Delivers the benefits of AHA/BHA/PHA (40% acid concentration)
- Produces a low level of irritation for an AHA/BHA/PHA peel
- Contains high Salicylic Acid levels and is keratinolytic
- May be layered with AGERA® Laboratories Pro Peel Prep and the AGERA® Laboratories Pro C Peel System
- Helps provide anti-acne benefits

## INSTRUCTIONS FOR USE

- **SKIN TYPE:** For all skin types

## AGERA® LABORATORIES Pro SLC Peel—50

*This peel provides the benefits of a medium-high-strength AHA/BHA/PHA peel with minimal irritation. This low-pH (1.1-1.2) system does not require removal and is recommended to be used in a layered system approach with AGERA® Laboratories Pro Peel Prep and the AGERA® Laboratories Pro C Peel System. AGERA® Laboratories Pro SLC Peel—50 is ideal for use on skin that is troubled by acne- and sun-induced hyperpigmentation. This treatment should be followed with a pigmentation suppressor such as AGERA® Laboratories Kojic Anti-Pigment Cream.*

### PRODUCT BENEFITS

- Delivers the benefits of AHA/BHA/PHA (50% acid concentration)
- Results in only modest irritation
- Contains high Salicylic Acid levels and is keratinolytic
- May be layered with AGERA® Laboratories Pro Peel Prep and the AGERA® Laboratories Pro C Peel System

### INSTRUCTIONS FOR USE

- **SKIN TYPE:** For all skin types
- **DIRECTIONS:** Apply with overlapping strokes. May be washed off after 10 minutes or neutralized in place with AGERA® Laboratories MagC® Peptide Serum
- **WHEN TO USE:** Use in applications suitable for mild chemical peels
